

**IN THE CLAIMS**

**Cancel claims 1- 6 and add new claims 10.**

**In Claim 7**, line 3, insert for the corner of the object to be held after “holder” and before line 4, insert said holder comprising a corner pocket for the corner edge of the object to be held.

in line 5, insert to a supporting surface for the holder after “held”.

Please cancel pages 10 , 11 and 12 with claims 1- 8 and substitute the following new pages 10, 11 and 12 .

A marked up copy of the amended claims is provided in the attachment entitled **Version with markings to show changes made.**

Sub G3 > Claim 9. A holder for an object and a supporting surface for the holder comprising:

a holder having three layers,

said holder comprising a corner pocket for the corner edge of the object to be held,

a supporting surface for the holder,

the first layer of said three layers having a non-slip surface to engage and bear against a surface of the object to be held,

the second layer of said three layers having magnetic material,

the third layer of said three layers consisting of at least one layer of a transparent material to form with first layer an object receiving pocket between the third layer and the first layer, and

said second layer being directly against and held to the supporting surface by the magnetic material.

al  
sub B<sub>1</sub>> **Claim 7.** The combination of holder and an object with corner edges comprising:  
a holder for the corner of the object to be held having at least three distinct material layers,  
said holder comprising a corner pocket for the corner edge of the object to be held to a supporting surface for the holder,  
the first layer of said three layers having a non-slip surface to engage and bear against the corner surface of the object to be held,  
the second layer of said three layers having magnetic material,  
another of said at least three layers consisting of at least one layer of a transparent material to form an corner object receiving pocket; and  
an object having corner edges to complement the size and shape of the receiving pocket formed.

a<sub>2</sub>  
sub B<sub>2</sub>> **Claim 8.** The combination of a holder and an object with corner edges as claimed in claim 7 wherein there are at least two substantially identical holders spaced from each other and adapted to engage in a receiving pocket a different corner of the object to be held.
